PROOF OF LIFE BEYOND? Arkansas Paranormal Research Association captures a compelling photograph of a figure in an empty hallway

On September 26, 2009, APRA's Technical Manager, Nathan James, caught a photograph of what appears to be a full bodied apparition at the Old Arkansas TB Sanatorium during an investigation there.

APRA Group Leader, Mindy Hunter, says that this may be the most significant photographic evidence APRA has captured to date. After weeks of debunking attempts, we simply have no explanation for this photo. This photo is available for public review on the APRA website (www.arkansasparanormal.net) specifically at URL:
